DETAILED ACTION

1. The drawings filed 10-12-2004 are acceptable.
2. Claim 13 is objected to as the term "the air guide" has no antecedent basis. It appears that claim 13 should be dependent on "claim 12" instead of "claim 11". Correction is required.
3. Claims 1-4 and 9-14 are rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1-9 of U. S. Patent No. 6,649,022 B2. Although the conflicting claims are not identical, they are not patentably distinct from each other because both sets of claims are directed to "a ventilated sealing head for an inductive cap sealer, comprising: a housing having openings; an induction coil producing an electromagnetic field when energized disposed in the housing so as to be cooled by the air; and a field focusing disposed in the housing to direct the electromagnetic field of the coil toward a sealing region" and a fan for passing air through the openings (claim 9 of the patent). The location of the openings in the housing would have been an obvious so that the air also cools the sealing cap after it first passes and cools the induction heating coil.

Art Unit: 3742

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and, *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 5-6, 15 and 16 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Terano (US 6,713,735) is further cited to show induction cap sealer with similar claimed features.
